## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I, claims 1-13, drawn to a device for removing painted field markings from a synthetic grass surface.**

**Group II, claims 14-22, drawn to a method of removing painted field markings from a synthetic grass surface.**

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common subject matter for Groups I and II, as listed above, is at least one rotating brush to abrade or contact the grass fibers or painted field markings thereon as well as supplying a solvent and pressurized water to this region of the grass surface. The patent to Zamboni 4,069,540 (hereinafter Zamboni) clearly teaches a device and method of removing painted field markings from a synthetic grass surface and which clearly teaches in Figs. 1, 2 and 6, for example, at least one rotating brush 50 to abrade or contact the grass fibers or painted field markings thereon as well as supplying a solvent (col. 4, lines 32-43) and pressurized water at 55 (col. 3, lines 3-13) to this region of the grass surface. Accordingly, since the subject matter common to both groups is known from Zamboni, there is lack of unity *a posteriori* since the common subject matter is not a special technical feature that defines a contribution over the prior art. The expression special technical feature is defined as meaning those technical features that define a contribution which each claimed invention, considered as a whole, makes over the prior art.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Chin whose telephone number is (571) 272-

1270. The examiner can normally be reached on Monday through Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
